

CHILLED WATER SKID

..for a non-stop performance!

Chilled water skids are the heart of the utilities and thus circulation of chilled water is to be ensured round-the-clock. Any interruption with this circulation causes temperature imbalance in the rooms.

PHARMA ENGINEERS have rich experience in utilities design and hence the selection of each component is carefully evaluated. We incorporate Auto balancing valves which work based on line pressure and are connected through VFD.

SALIENT FEATURES

- Completely skid mounted
- Inline Vertical inline pumps
- Air separator
- Pressure boosting
- Plug and play installation
- Required safety interlocks for low water
